

MFB-60012: METZIN FLEXIBLE FIBER BOROSCOPE - 6 mm x 1.2 meter

Portable Flexible Borescope is made of silica fibers (not cheap plastic fibers like competitors!) and highly flexible insertion tube that would be able to slide into very small tubes or spaces. This feature permits one-handed operation allowing your other hand to do the work! Rugged and water and oil resistant, this borescope inspection tool is ready to handle many inspection tasks requiring a flexible borescope

FEATURES

- Close-up focusing-objects as close to the lens as 3cm
- Ergonomically designed, non-slip handle fits comfortably in one hand
- One-handed operation-focusing and light activation can be achieved one handed freeing the other hand for work
- Integrated focus ring for smooth, continuous focusing
- 1.2 m working long insertion tube length will reach deep into walls, drains, vents, engine blocks, etc. and requires only a 0.24" (6mm) opening
- Flexible, omnidirectional cable flex in every direction to allow precise viewing "Non-Obedient" cable will not resist going through angled tubes or around corners. Durable insertion tube water and oil resistant, allowing you to get in the most difficult places.
- Convenient, adjustable eyepiece Super Bright LED lamp illuminates dark locations for clear viewing. No need to replace LED lamp! Life of LED lamp more then life of the borescope.
- Rugged ALUMINIUM carrying case Sealed lens and cable are submersible for underwater use
- Operates on 3 AA batteries
